prym.ergonomics - knitting simply made easier.

Light and flexible, the knitting needles and crochet hooks from the prym.ergonomics range represent a new generation of easier knitting and crocheting while setting new standards in innovative design. Developed in close cooperation with experts, the hooks and needles are sure to impress with a perfect symbiosis of functionality and aesthetics.

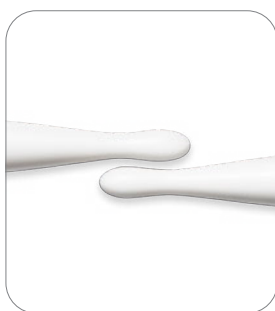

Form follows function.

The Prym ergonomic knitting needles quickly warm to the touch, are smoothly polished for easy gliding of the stitches and still allow a good, relaxed grip. Made from high-performance synthetic material, the needles are extremely light and pleasantly flexible in the hand. In neutral alabaster white, they are designed to grace any type of wool! The needle gauge is prominently printed in the centre of the needle for quick and easy identification of its size.

Handled softly

This crochet hook for wool has what it takes to be a standout: Shaft and hook are highly polished for a stunningly flawless finish that ensures optimal gliding through the stitches. The ergonomic design of the handle gives it a pleasant feel for comfortable crocheting without fatigue, no matter how the hook is held

The hook tips

Small drop-shaped ends of the needles help to pick up and guide the yarn safely and smoothly.

The click heads

Ingeniously designed needle ends work as stitch stoppers and keep pairs of single-pointed knitting needles together.

The steel cable

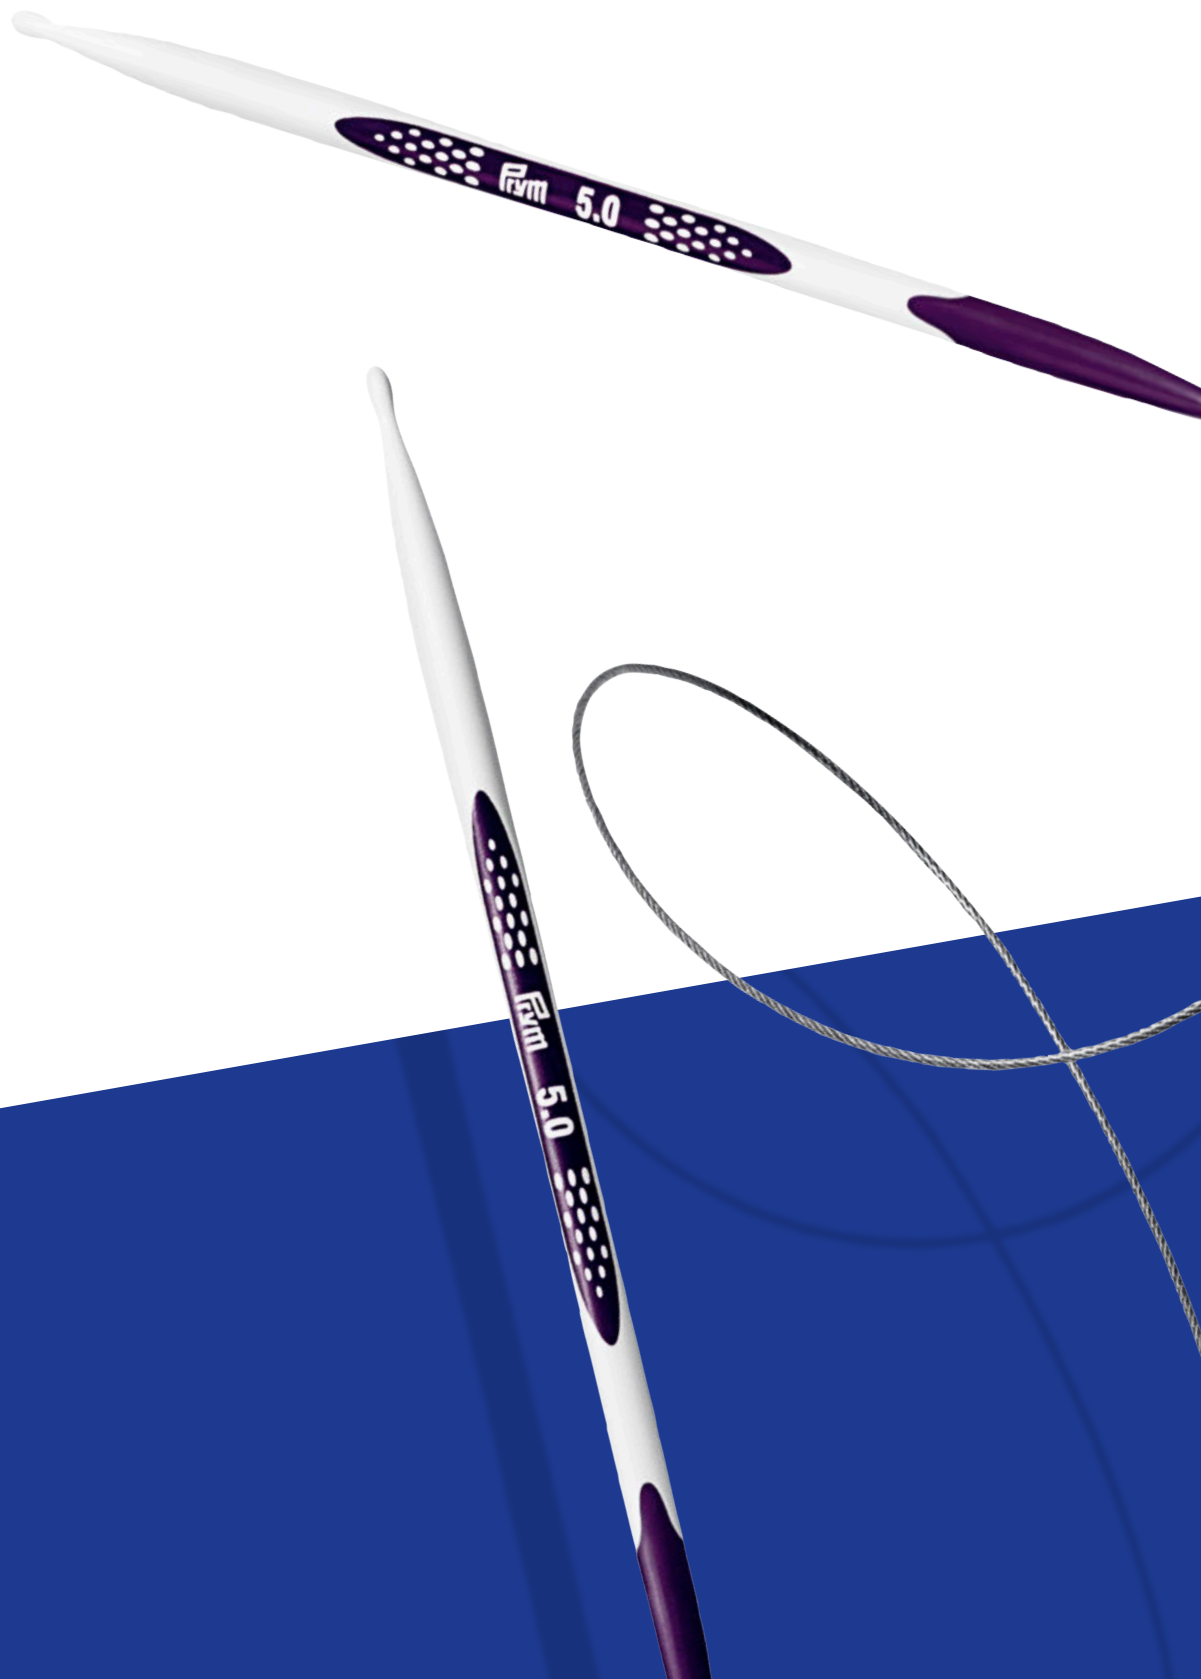

Soft and flexible, the tangle-free steel cord of the circular knitting needle makes the spiral effect a thing of the past.

Carbon Technology

Innovative materials ensure lightness and stability, even in thinner needle gauges.

Quality that makes you want to knit.

All needle points are sharp - so one thinks.

But needle points are not necessarily pointed. Prym needle points are designed in such a way that splitting threads and yarns is made virtually impossible, while ease of gathering threads and yarns can still be taken for granted. Prym needle points are neither too sharp nor too blunt, but are designed to make knitting a real pleasure.

Take a closer look at the surface.

Because the quality of the surface holds the true secret for the quality of knitting needles. They must be smooth, free of pores and non-tarnishing. Only then can an optimum smooth gliding action be achieved for all types of wool.

When things come full circle.

The quality of circular knitting needles can be seen from the flexibility of the plastic cord. On Prym circular knitting needles the cord is snap-proof, flexible and antistatic. The transition from shaft to cord is permanently fixed, completely smooth and elegantly proportioned so that the stitches slide smoothly from shaft to cord and vice versa.

The needle point

Not too sharp, not too blunt. Ideally shaped for professional knitting.

The circular knitting needle

Absolutely smooth transition from shaft to cord for trouble-free gliding of the stitches.

The single-pointed knitting needles

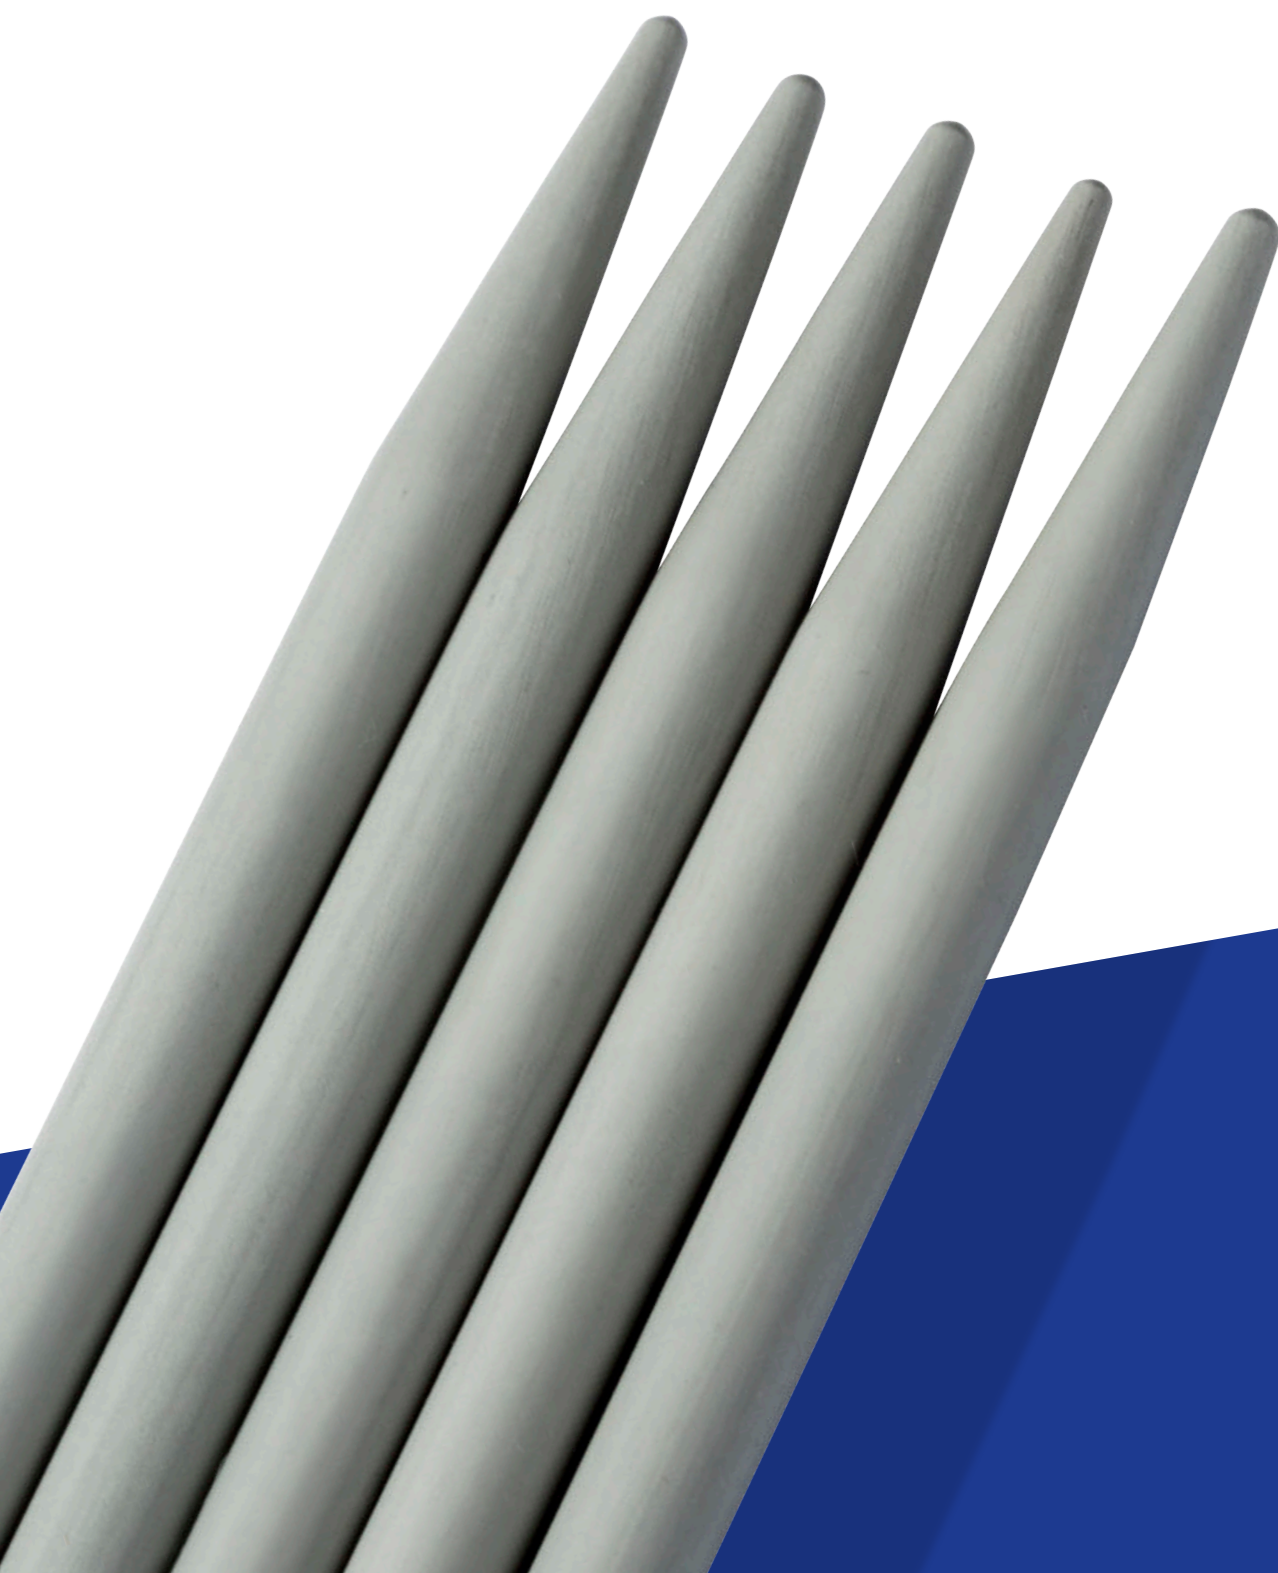

Colour-coded and numerically coded knobs facilitate identification and prevent the stitches from slipping off.

The shaft

Free of pores and non-abrasive for an optimum gliding action.

Points and gauges

How to get hooked on quality.

So it all goes smoothly.

When crocheting, the snag is often the crochet hook itself. Unless, of course, you're using Prym crochet hooks, which are absolutely smooth and free of burrs. The exceptional quality of these hooks is made possible by a particularly intricate manufacturing process.

It all comes down to the right guidance.

In addition, Prym crochet hooks also feature an ergonomic guide plate which makes it considerably easier to hold the hook in the correct position for crocheting.

The thread loves the groove.

An additional feature of Prym crochet hooks is their specially aligned groove that ensures uniform stitches. Furthermore, the transition from hook to shaft on Prym crochet hooks is so smooth that the thread can run absolutely snag-free.

The hook

Completely smooth and free of burrs due to a special manufacturing process.

The thread groove

For absolutely uniform thread guidance.

The crochet hook for wool with soft handle

Ergonomic handle with a pleasant feel: crochet hooks with soft handle have a smooth transition from handle to shaft. The conical end of the handle prevents pressure points.

The guide plate

Particularly ergonomic guide plate ensures the hook is held in the correct position for crocheting.

Points and gauges

Points and gauges IMRA

Quality meets natural aesthetics.

Lightness carries weight.

Crafted from the finest Chinese bamboo, these needles are exquisitely light, making them easy on the joints for naturally effortless knitting and crocheting. Beautifully smooth and warm to the touch, they are designed for absolute creative pleasure.

Smoothly does it.

Bamboo, quite deservedly, has made it to the top of popularity as a material for knitting needles and crochet hooks. Supremely soft and warm to the touch, its unique tactile qualities fuse into a fascinating symbiosis with a flawless finish. Designed for ultimate performance and comfort, the stitches glide seamlessly to a stunning result.

Natural. But better.

Bamboo knitting needles and crochet hooks are simply beautiful. Needless to say, Prym only uses the best quality of this rapidly growing, renewable resource, getting right to the point of harnessing the advantages of this natural resource, such as strength, flexibility and its low weight.

The point

The slender, perfectly tapered point ensures easy insertion.

The surface

Smooth surface – for easy gliding of the stitches without snagging.

Seamless transition

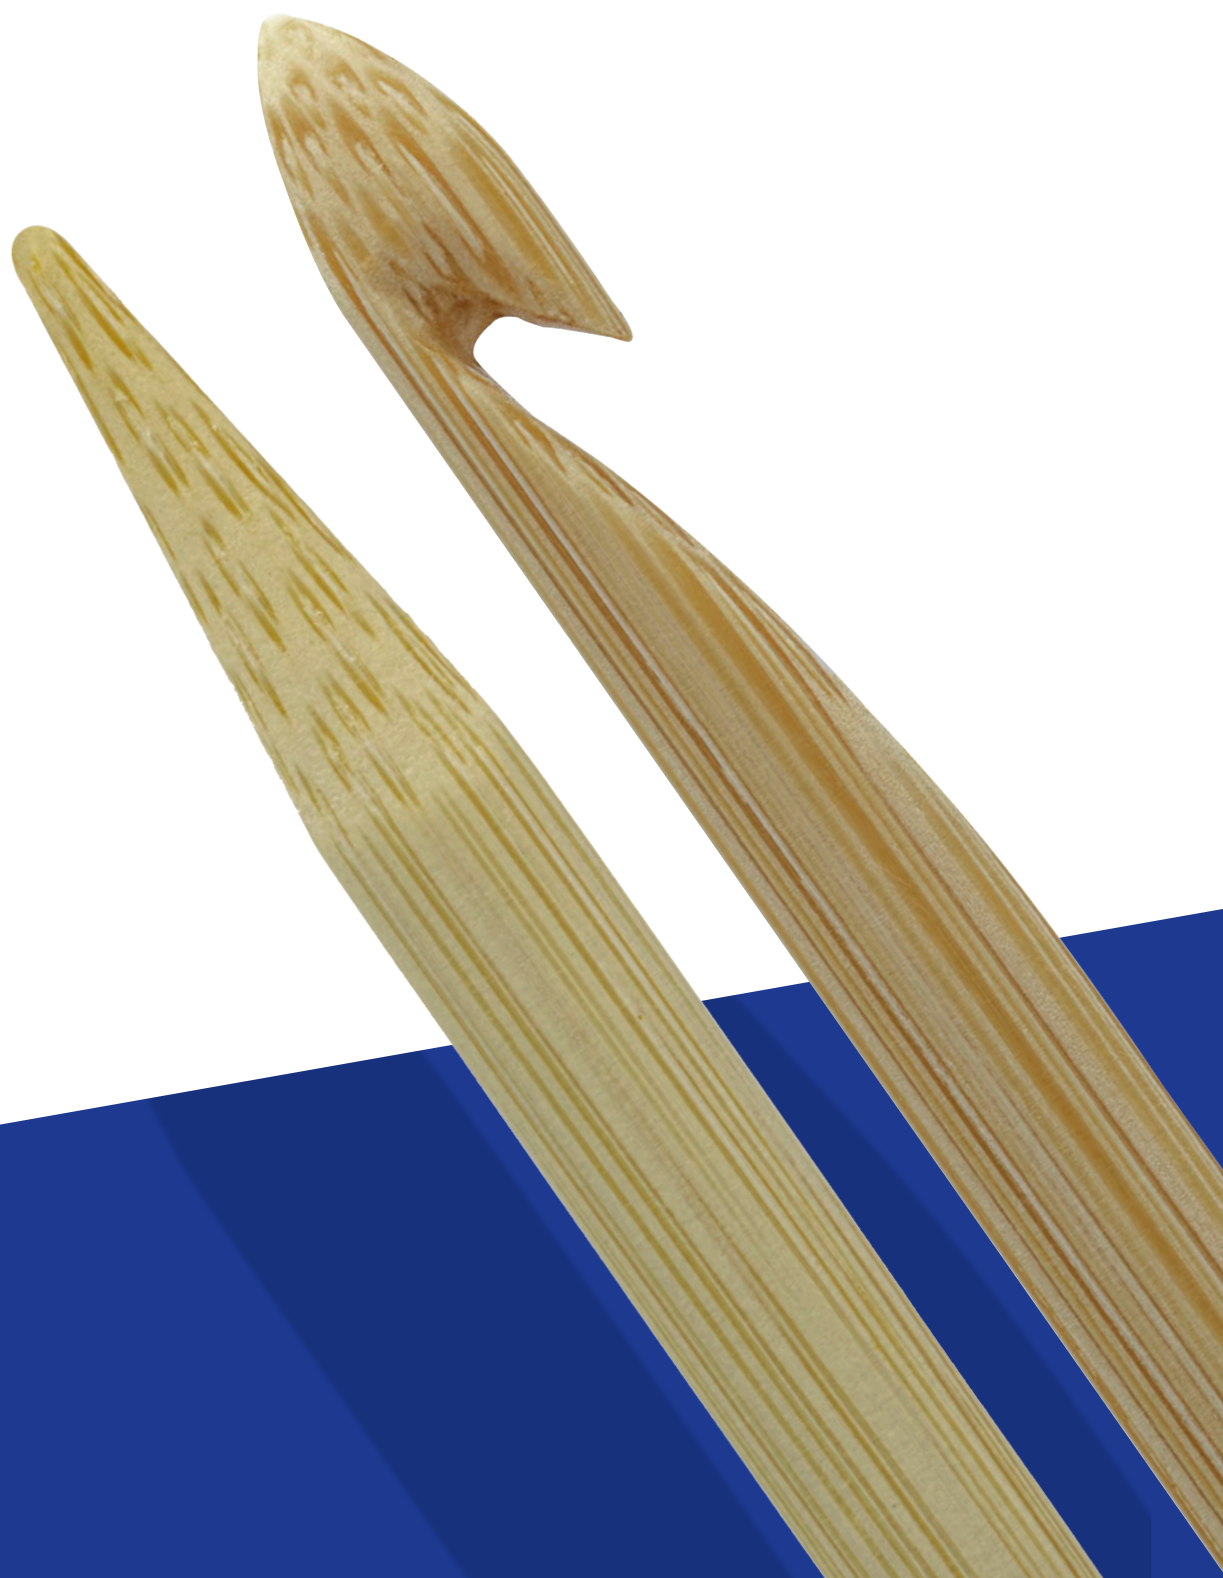

Precise fit: the flexible cord with virtually unnoticeable transition to the shaft.

Plastic-free packaging

Mindful use of raw materials for sustainable handicraft pleasure.

Natural quality is in the details.

Knitting needles designed for elegance.

Natural needles are real charmers, captivating with a smooth, polished surface that is warm to the touch for hours of fatigue-free knitting. Stitches glide effortlessly with no snagging, which explains why natural knitting needles are a deservedly popular choice among knitters. Boasting optimal knitting performance, the needles are sure to impress with their unique colour scheme.

Perfect to a point for any yarn.

The heart of the Prym natural knitting needles lies in their tips. Well-tapered and perfectly pointed, the ends slip easily into stitches and effectively prevent splitting of the yarn. Whatever the choice of yarn or needle, these elegant companions guarantee naturally effortless knitting performance that will make any project fun

Good job all round.

This thought-out assortment delivers flexible performance of stellar quality. The circular knitting needle inspires with its superbly designed connectors for hassle-free attachment of interchangeable cords. A smooth join ensures easy gliding of the stitches with no snagging and is sure to spark the enthusiasm of beginners and experienced knitters alike.

The point

Perfectly tapered to a point for faster knitting.

The surface

Polished, smooth surface for easy gliding of the stitches without snagging.

The circular knitting needle

Virtually seamless transition from shaft to cord. With interchangeable cord for extra flexibility and convenience.

Quality you can count on.

Well thought-out designs.

Well thought-out accessories make the joy of arts and crafts a real pleasure. With Prym your customers will find a wealth of brilliant ideas for making knitting even more pleasurable.

What else is included?

Just take the practical knitting calculator for instance. Clearly laid out design, simple to use, easy and convenient to read: a quality product designed and made by people who love and understand knitting. And this can be sensed with all the other accessories too – from finger guards to the wool comb.

More customer satisfaction.

With Prym needlework accessories your customers can always count on absolute top quality.

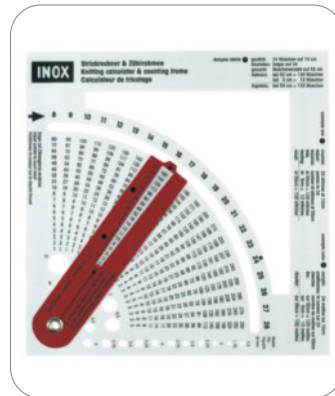

The rotally

Makes every pattern effortless to follow.

The knitting thimble

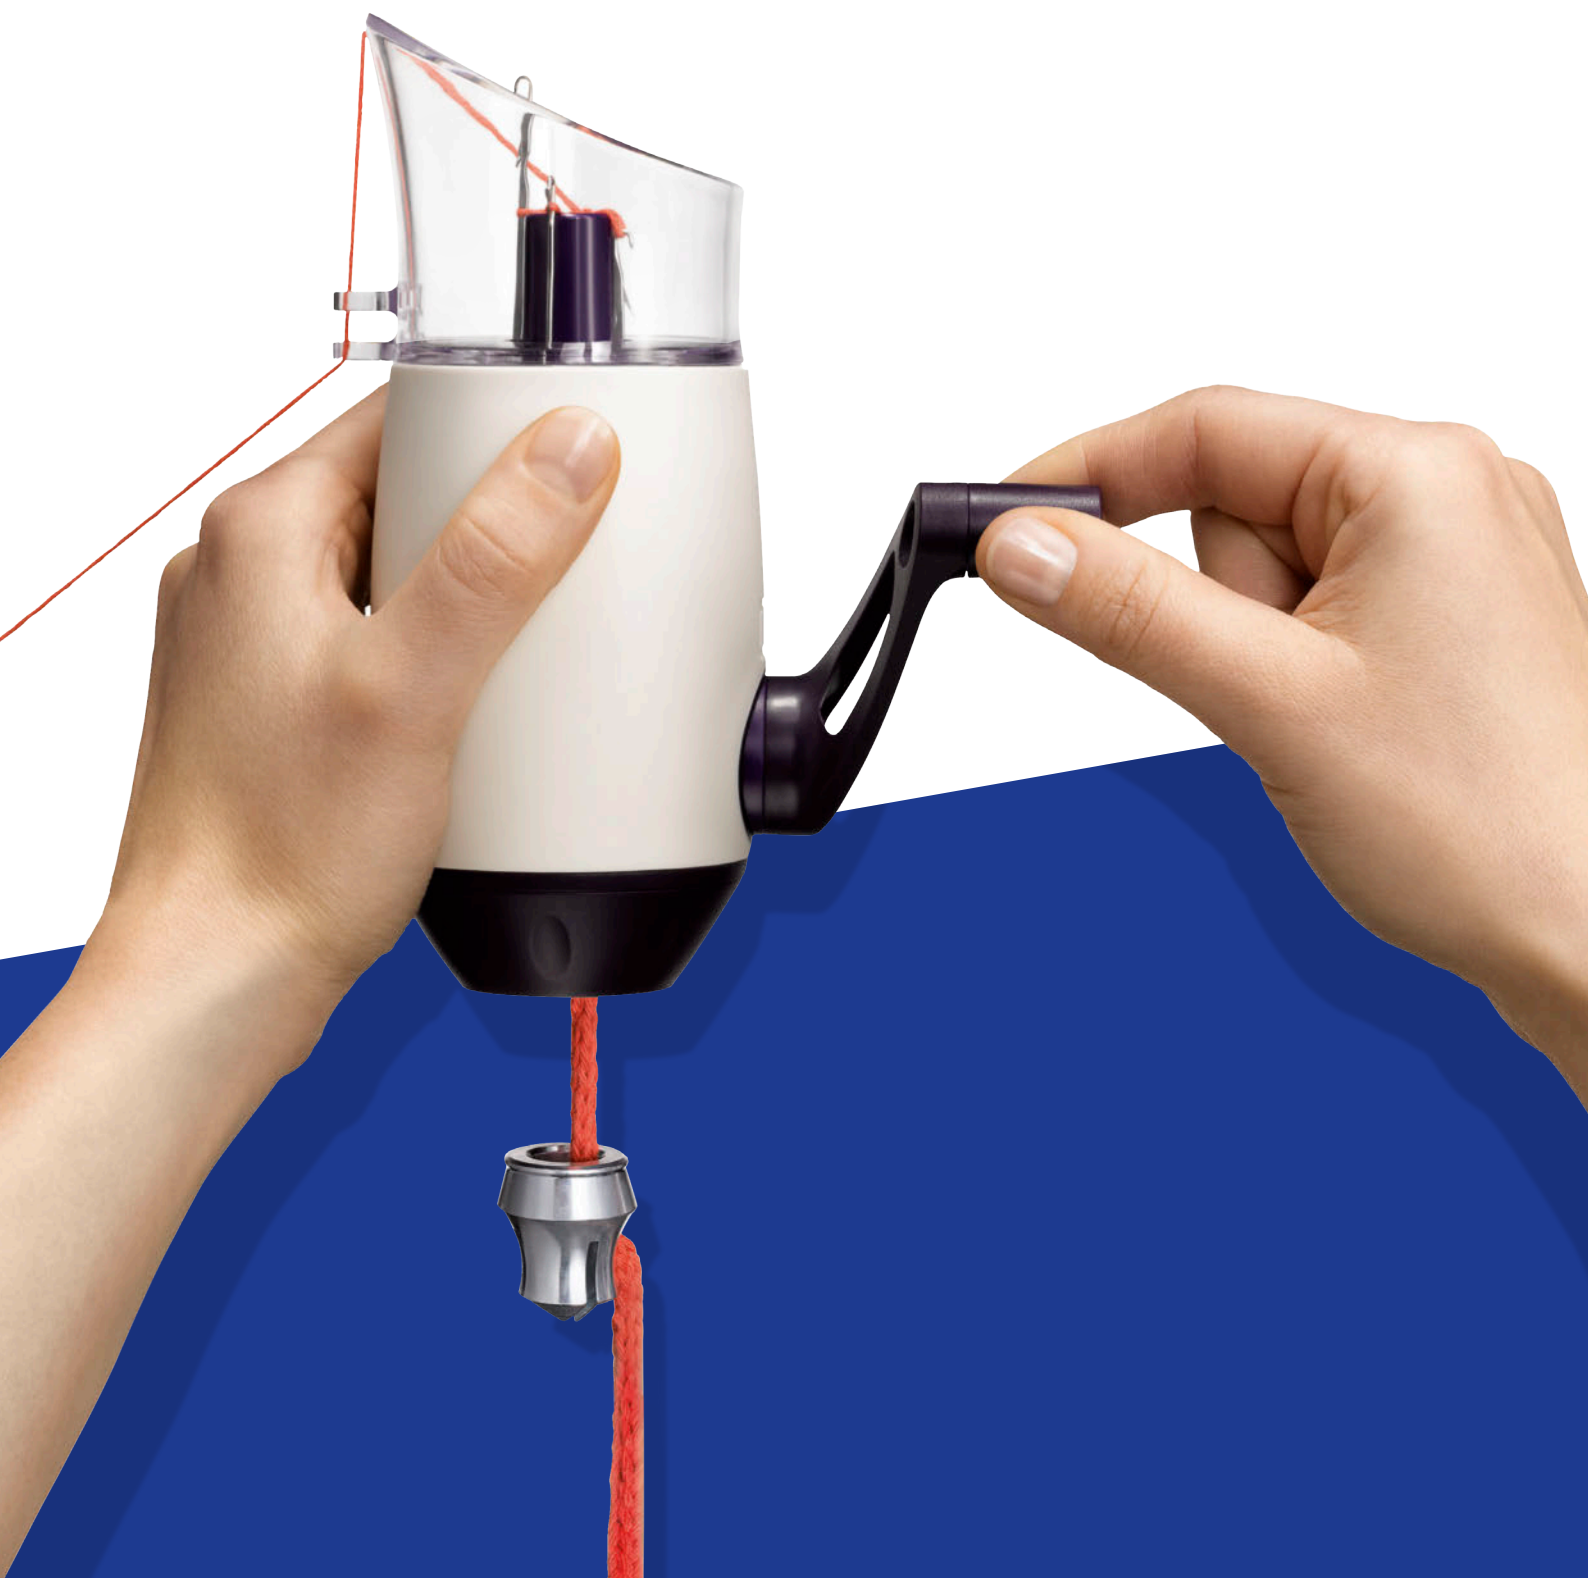

Makes knitting easier and more orderly.

The knitting calculator

Simple, clear, practical.

Quality of the finest.

In Prym's embroidery product range you will find needles in all the usual gauges – from the fine 0.6 mm needle for filigree work to the robust 2.4 mm needle for coarser materials. Whatever you choose, the quality is always of the finest level. And this also applies to the extensive range of embroidery accessories. From the special embroidery scissors to the exclusive magnifying glass with lamp, you can offer your customers everything so that every stitch is right first time.

The eye

A smooth eye allows easy threading and does not damage the thread.

The needle surface

Evenly polished and non-porous surfaces guarantee excellent smooth sewing and good protection against rust.

The needle resilience

Properly selected and controlled resilience ensures skilful work with no bending or breaking of the needles.

The needle points

For each material used there is an optimum needle point - for instance, tapestry needles with blunt points make embroidery easier on evenweave fabrics.

The ground surface

Precisely ground right to the tips to guarantee excellent cutting performance.

The blades

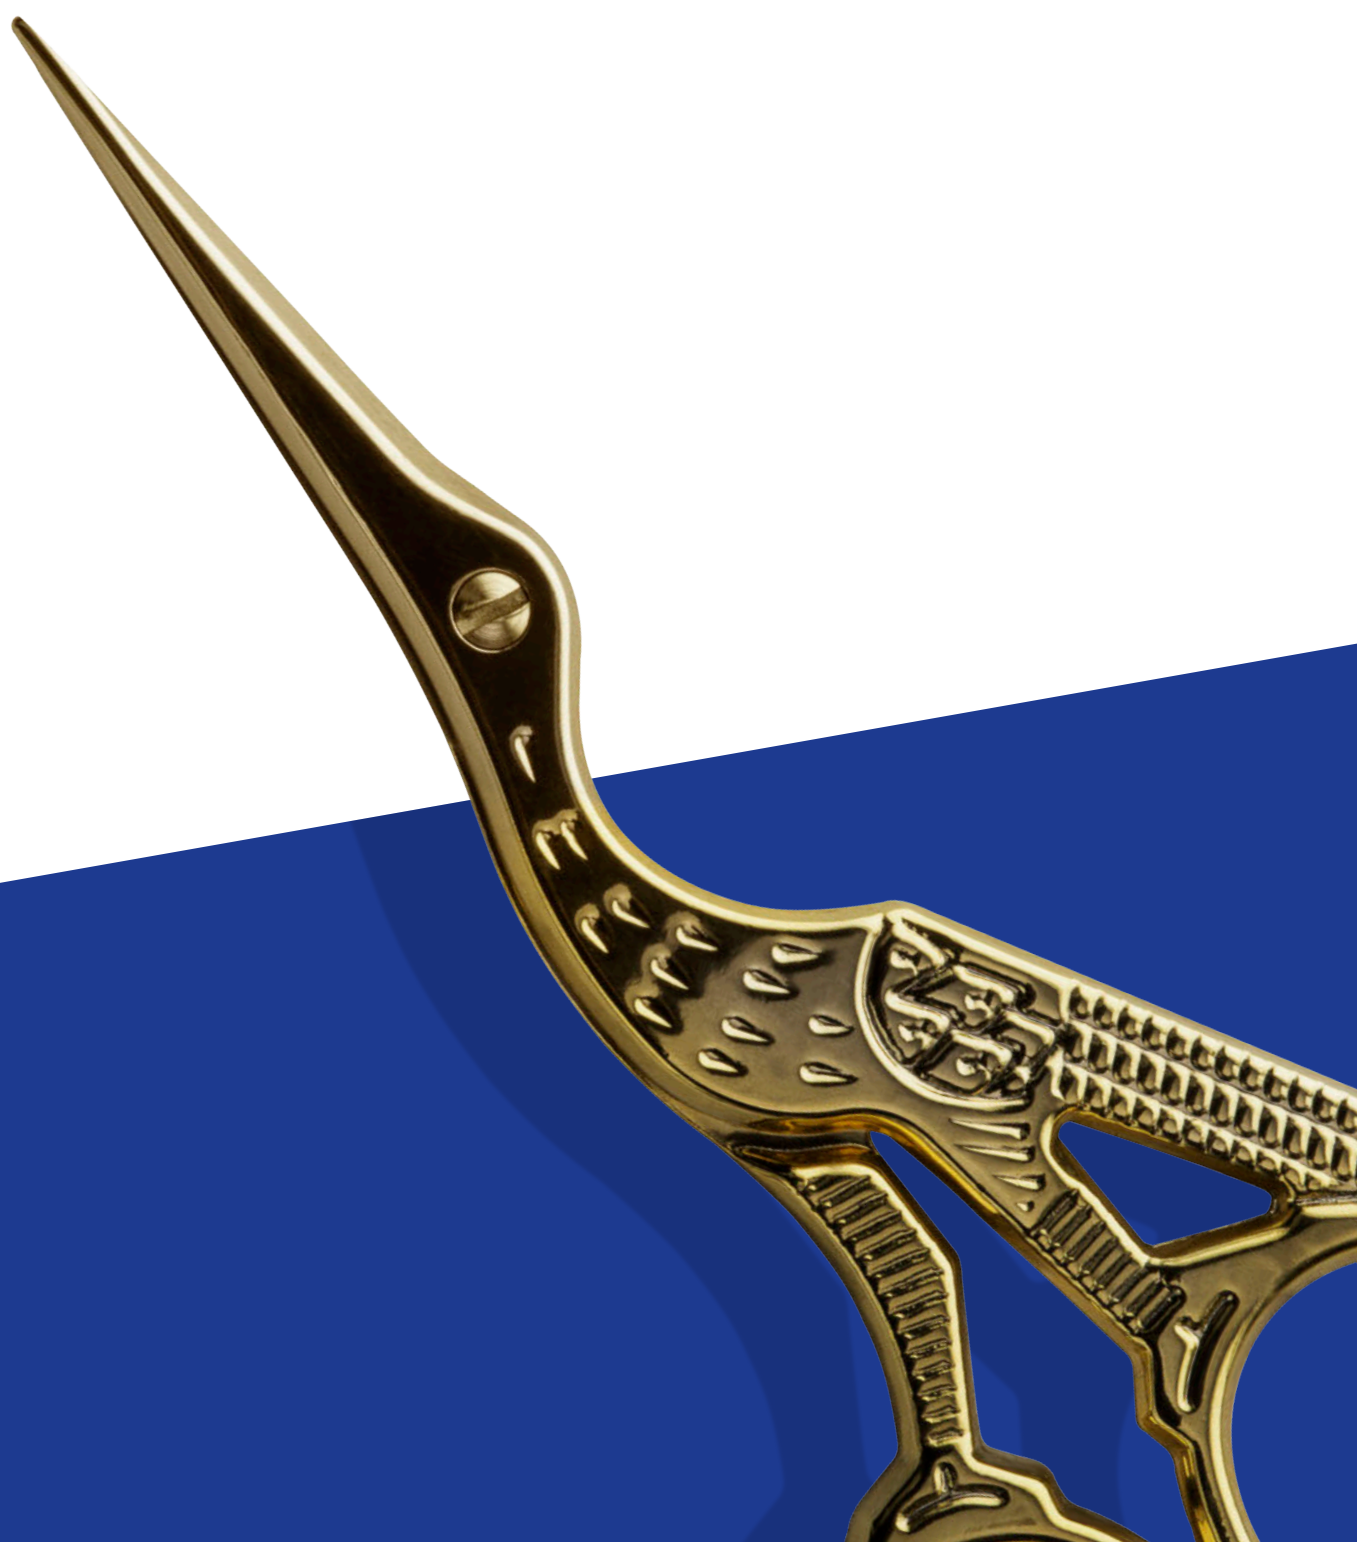

Made of high-quality stainless steel, these blades are so well mounted and ground that squashing or crushing of the fabric when cutting is made impossible.

The bent tip

The bent tip developed by Prym ensures convenient, precise cutting comfort for any embroidery work. The angled blades also make it easy to correct embroidery and separate threads on the top side of the fabric without damaging the lining.
