Superbly elastic.

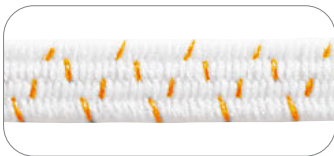

Quality claim.

Elastics from Prym along with the appropriate accessories are of particularly high quality. As a symbol of this, many of them still feature the traditional zigzag thread worked into them – as always the guarantee for meeting stringent requirements.

Thanks to using only first-class raw materials, a perfectly coordinated fibre mix, and tested quality rubber, heavy strain or stress are not a problem for Prym elastics. They can even be washed at high temperatures without losing any of their outstanding qualities, are resistant to wear and protected from wearing out. As a result, they meet a whole variety of requirements in any area of dressmaking or sewing.

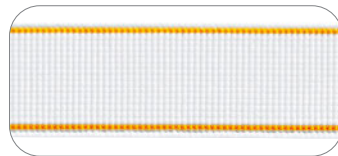

✿ Oeko-Tex certificate.

Prym elastics meet stringent standards certifying environmental and skin friendliness and sustainability. This can easily be identified by the flower symbol. Products provided with this label are manufactured according to the high Oeko-Tex standard. The environmentally friendly and resource-saving production processes are regularly checked by independent institutes.

Braided elastics

The golden zigzag thread in the products indicates braided elastics. When stretched, the elastics get narrower. The elastic threads are arranged next to each other and are evenly distributed (e.g. Standard elastic).

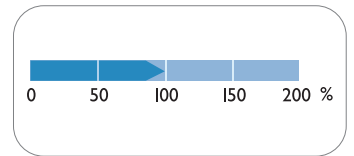

Woven elastics

Woven elastics have weft and warp threads. The threads are arranged lengthwise and crosswise to the direction of the elastic. When stretched, the elastic tape width remains the same (e.g. Elastic tape).

Knitted/crocheted elastics

Knitted/crocheted elastics are available for fine, lightweight fabrics (e.g. Elastic tape soft).

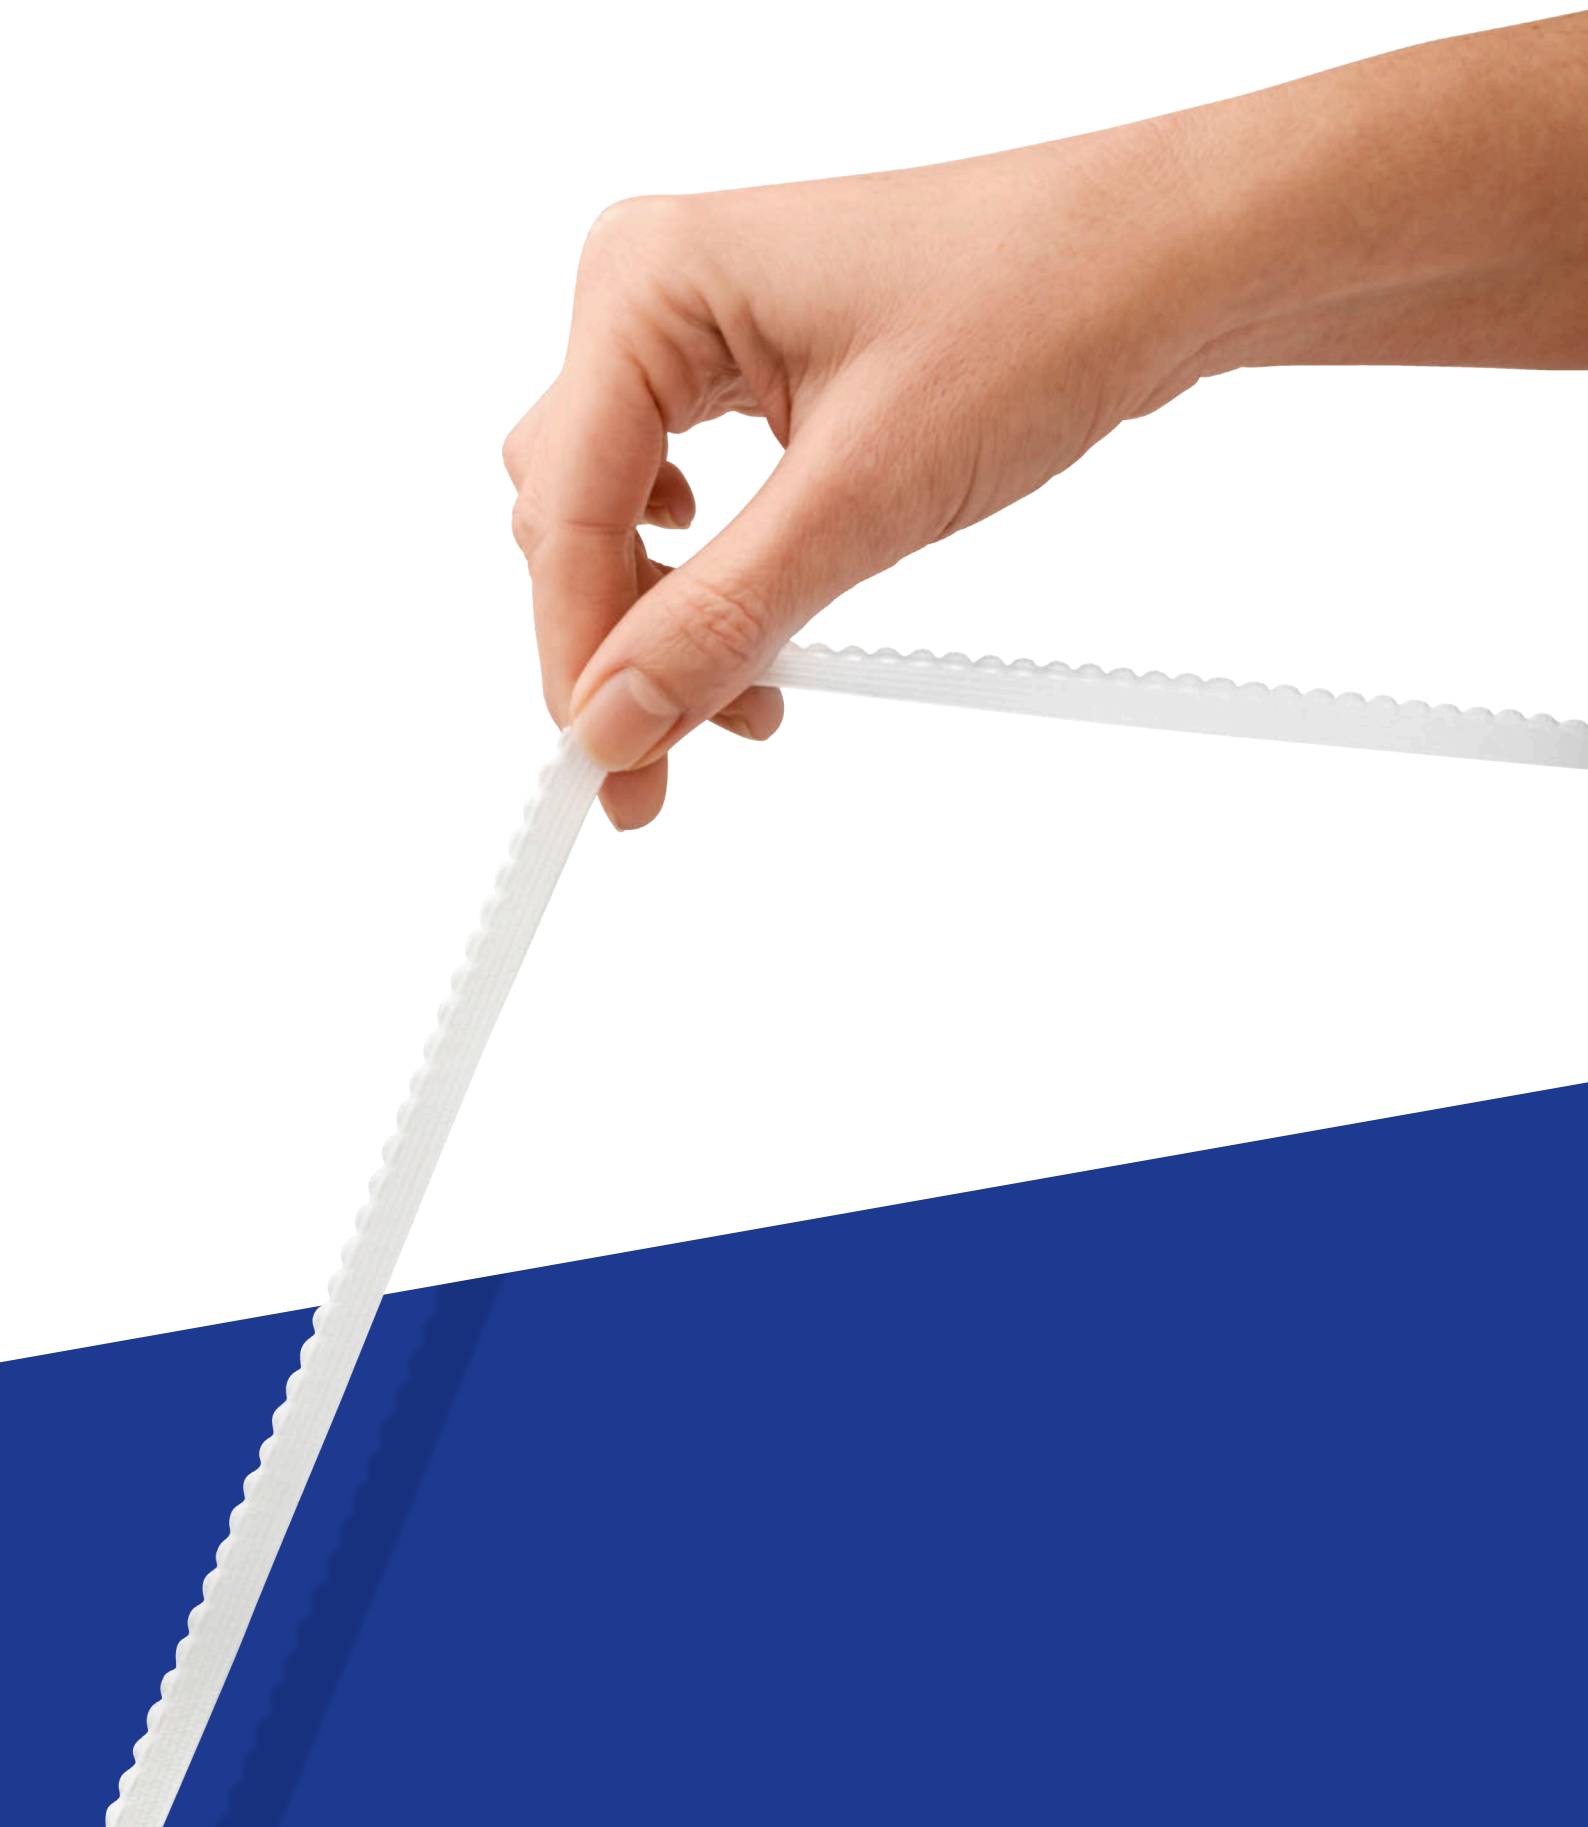

Elasticity

The diagram shown here indicates the elasticity of the different types of elastics. The percentages show how far an elastic tape can roughly be stretched from its original length.
