Symbol for tradition and innovation.

If there was ever a product in the history of our company that not only reflects the great Prym tradition, but, at the same time, also represents our constant aim to convince by innovation, then it is without doubt the "classic" Prym sew-on snap fastener.

It was with this easy-to-use and just as easy-to-make fastening, over one hundred years ago, that Prym ventured out into a new business dimension. Since 1903 it has always been a convincing choice due to its so-called "S-spring", which Prym invented and patented and is constantly further developing. Incidentally, thanks to its high quality and various important details, such as the completely rustproof brass construction, our "classic" product usually outlives the garments or accessories in which it is fitted.

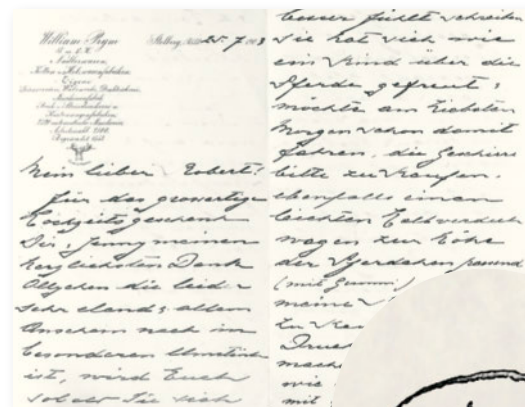

The S-spring system

The optimum shape and specially selected and processed material of the S-spring guarantee that the fastener will always retain a constant opening and closing force – and that's for its entire life.

The flanged edge on the stud

The edges of the fastener studs are flanged and therefore have no sharp edges. This protects the fabric from damage.

Quality of the highest precision – Prym non-sew products.

The branded quality of non-sew press fasteners, eyelets, rivets and jeans buttons already comes to light in the simple and problem-free riveting using cleverly designed attaching tools. After all, it was Prym that first made non-sew products available to consumers – and to this day our customers still benefit from our many years of experience.

Non-sew products from Prym are exclusively manufactured from high-quality materials. Perfected production processes and finishing techniques ensure resistance to corrosion and precise, lasting function. Washing, spinning, dry cleaning, ironing, mangling – no problem for non-sew products from Prym.

Jersey

Jersey press fasteners with light fastening strength are particularly suited for baby and children's wear.

Anorak

Thanks to their medium fastening strength, press fasteners in the Anorak range are ideal for anoraks, dresses, skirts or fine leather items.

Sport & Camping

Where things are more robust, e.g. for sportswear or camping, for thick leather or tent fabrics, our press fasteners in the Sport & Camping range with heavy fastening strength are the first choice.

Eyelets with washers

They are the right choice for lace-up fastenings and handicrafts, as fashionable decorative elements, for garments and home décor.

Jeans buttons

These buttons are specially designed for use on denim jackets and jeans.

The Vario pliers

A variety of fasteners can easily be attached without any problem using the Prym Vario pliers. For needlework, handicrafts or repair work.

Non-sew press fasteners, eyelets and rivets
