## Interfacings, adhesives, hook and loop fasteners – that sticks!

Prym's range of adhesives can be used for a wide variety of materials from cotton to synthetics and even leather.

Permanent adhesives and such that are used for temporary fixing facilitate a multiplicity of creative work. Many of these adhesives easily wash out to provide an extra benefit as a special attribute.

Their ease-of-application over larger areas or in small, exact doses, even directly during machine sewing, facilitates their use as adhesive and repair articles to open up interesting options for versatile use.

All adhesives comply with the statutory requirements and standards.

### Wonder tape

The wonder tape is a tremendous help when sewing curtains, hems or zip fasteners. The double-sided adhesive tape fixes everything that needs to be tacked for sewing on or in or hemming. The laborious use of pins and tacking are now a thing of the past.

### Fusible bonding yarn

The fusible bonding yarn helps make hems with invisible seams. It can be used for making invisible hems. It replaces thread on the sewing machine or overlock. After neatening the fabric, the hem is simply ironed in place.

### Fray Check

The Fray Check prevents fraying around buttonholes or along seams, hems or shirt collars.

### Textil+ Adhesive

The Textil+ Adhesive permanently bonds fabrics. It is particularly suited for leather, rubber, wood, metal and lots more.

# Interfacings, adhesives and hook & loop fasteners

93 x 185 mm

**Waist shaper  
interfacing**  
for ironing on

for reinforcing waistbands  
on skirts and trousers; the  
perforations make it easier to  
apply
